Special Issue: Big Data: Data Science in Nursing

Volume 39

Number 1

January 2017

Special Issue: Big Data: Data Science in Nursing

Contents

Guest Editorial

- Big Data: Data Science in Nursing 3
Connie White Delaney and Bonnie Westra

Big Data Special Issue Papers

- Explorative Analyses of Nursing Research Data 5
Hyeoneui Kim, Imho Jang, Jimmy Quach, Alex Richardson, Jaemin Kim, and Jeeyae Choi
- Framework for Mining and Analysis of Standardized Nursing Care Plan Data 20
Ashfaq Khokhar, Muhammad Kamran Lodhi, Yingwei Yao, Rashid Ansari, Gail Keenan, and Diana J. Wilkie
- Big Data Cohort Extraction to Facilitate Machine Learning to Improve Statin Treatment 42
Chih-Lin Chi, Jin Wang, Thomas R. Clancy, Jennifer G. Robinson, Peter J. Tonellato, and Terrence J. Adam
- Standardizing Physiologic Assessment Data to Enable Big Data Analytics 63
Susan A. Matney, Theresa (Tess) Settergren, Jane M. Carrington, Rachel L. Richesson, Amy Sheide, and Bonnie L. Westra
- Using Embedded Sensors in Independent Living to Predict Gait Changes and Falls 78
Lorraine J. Phillips, Chelsea B. DeRoche, Marilyn Rantz, Gregory L. Alexander, Marjorie Skubic, Laurel Despins, Carmen Abbott, Bradford H. Harris, Colleen Galambos, and Richelle J. Koopman
- Novel Analytic Methods Needed for Real-Time Continuous Core Body Temperature Data 95
Vicki Hertzberg, Valerie Mac, Lisa Elon, Nathan Mutic, Abby Mutic, Katherine Peterman, J. Antonio Tovar-Aguilar, Eugenia Economos, Joan Flocks, and Linda McCauley
- Visualization of Multidimensional Data in Nursing Science 112
Sharron L. Docherty, Allison Vorderstrasse, Debra Brandon, and Constance Johnson
- Discovering Public Health Nurse-Specific Family Home Visiting Intervention Patterns Using Visualization Techniques 127
Karen A. Monsen, Jessica J. Peterson, Michelle A. Mathiason, Era Kim, Brian Votova, and David S. Pieczkiewicz
- Studying Associations Between Heart Failure Self-Management and Rehospitalizations Using Natural Language Processing 147
Maxim Topaz, Kavita Radhakrishnan, Suzanne Blackley, Victor Lei, Kenneth Lai, and Li Zhou
- Word Adjacency Graph Modeling: Separating Signal From Noise in Big Data 166
Wendy R. Miller, Doyle Groves, Amelia Knopf, Julie L. Otte, and Ross D. Silverman
- Profiling Patient Characteristics Associated With the Intensity of Nurse Care Coordination 186
Tae Youn Kim and Karen D. Marek
